

Continuous Professional Development (CPD) Webpage

Objective

The purpose of this activity is to develop a web-based CPD portfolio which will enhance your employability by showcasing your skills in a complementary way to a CV.

CVs provide limited depth to skills and there is often no space to give evidence of competencies. A personal webpage will allow you to provide a complementary narrative that can enhance your chances of getting an interview.

It is recommended that you include a link to your CPD webpage at the top of your CV when you are applying for jobs.

You will be assessed twice on your CPD webpage:

- **Semester 1 (5% of Unit marks)**
 - You will be evaluated on the criteria listed in this document
- **Semester 2 (5% of Unit marks)**
 - You be evaluated on whether you have made improvements based on the feedback you receive in S1, as well as whether your webpage has been kept updated with the work you have done over the two semesters

Content

Your webpage should be visually appealing, making good use of images and videos, and be easy to navigate. Context should be provided for any graphical elements, but this should be short (no long descriptive paragraphs).

Your webpage should have the following elements:

- Your picture/avatar
- Clear (short) personal bio
- List of your skills
- Describe your career objectives and/or research interests
- Clear, custom (short) description of projects or videos
- Links to GitHub page, CV and LinkedIn (at least two)
- Links to other information about projects (such as reports, repositories etc.)

The use of copyrighted material without acknowledgments will incur a -15% penalty.

Submission

There will be an assignment submission link on CANVAS. You need to provide a weblink which will then be evaluated.

The submission deadlines are:

- Initial CPD Portfolio
 - **Friday 31st October 2025 14:00**
- Final CPD Portfolio
 - **Friday 15th May 2026 14:00**

Mitigating Circumstances

Any mitigating circumstance requests should be directed to the Teaching Office.
